

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently amended) A container ~~having an interior and an exterior, the container~~ comprising:

a top portion pivotally connected to a base portion, each of said top portion and said base portion having an interior and an exterior; and

a holder removably mounted to a selected portion of the container, said selected portion comprising the interior of one of said top portion or said base portion on the interior of said container, and further comprising sides that define a periphery, said holder having a storage area which is accessible from said interior of the container when the holder is inserted in a first position and accessible from said exterior of the container when said holder is inserted in a second position; and

a passageway adapted to slidably receive said holder through one of said sides of said selected portion.

2. (Original) The container of claim 1 wherein said container comprises a toolbox.
3. (Original) The container of claim 2 wherein said holder is adapted to receive accessories.
4. (Canceled)
5. (Currently amended) The container of claim 1 further comprising a bracket in said passageway, said bracket being adjacent to at least two walls of said

~~passageway sides of an aperture located in said one of said top portion or said base portion.~~

6. (Original) The container of claim 5 wherein the holder further comprises rails adapted to engage slots in said bracket.
7. (Original) The container of claim 5 wherein said bracket comprises two side bracket members and a bottom portion.
8. (Currently amended) The container of claim 1 further comprising a bracket formed in a said passageway ~~of one of said top portion or said base portion.~~
9. The container of claim 8 wherein said bracket further comprises slots adapted to engage rails on said holder.
10. (Currently amended) The container of claim 8 wherein the one ~~other~~ of said top portion or and said base portion not comprising said bracket further comprises an extended portion.
11. (Original) The container of claim 5 wherein said bracket further comprises slots adapted to engage rails on said holder.
12. (Currently amended) A container comprising:
 - a top portion pivotally connected to a base portion; ~~and~~
 - a holder slidably and reversibly mounted in a bracket located adjacent to an aperture in a selected portion of the container, said selected portion comprising one of said top portion or said base portion, and further comprising sides that define a periphery, wherein said holder comprises a door pivotally connected to a bottom portion of said holder and wherein said holder is adapted to receive accessories, said

accessories being accessible from the interior of the ~~toolbox~~ container when said holder is inserted in a first position and accessible from the exterior of the ~~toolbox~~ container when said holder is inserted in a second position; and

a passageway adapted to slidably receive said holder through one of said sides of said selected portion.

13. (Original) The container of claim 12 wherein said holder is made from a transparent material.
14. (Original) The container of claim 12 wherein said bracket comprises at least two side members and a bottom portion.
- 15-18. (Canceled)
19. (New) A method of deterring theft of accessories in a container, wherein the container comprises a holder insertable in a first position or a second position, the method comprising:
 - providing a container as recited in claim 1; and
 - inserting said holder of said container in said first position to prevent theft of said accessories.
20. (New) The method of claim 19 wherein the container further comprises means for retaining said holder in said first position.
21. (New) The method of claim 20 wherein said means for retaining said holder in said first position comprises a clasp.

22. (New) The method of claim 20 wherein said means for retaining said holder in said first position comprises an extension on one of said top portion or said base portion
23. (New) The method of claim 19 further comprising removing said holder from said first position and inserting said holder in said second position to allow access to said accessories.
24. (New) The method of claim 23 wherein the container further comprises means for retaining said holder in said second position.
